

- + Azure skill-building with an industry perspective
- + Self-paced online training using a high-quality video format
- + Led by IT experts (MCTs, MVPs, etc.)
- + Practical exercises in the lab
- + Live sessions via Microsoft Teams

Blended learning incl.
8 live sessions

 5:30pm – 6:30pm

 Target group:
Software Engineer &
Architects, Developer

 Pilot price
750.00€ p.P

Developing solutions for Microsoft Azure

Next start date

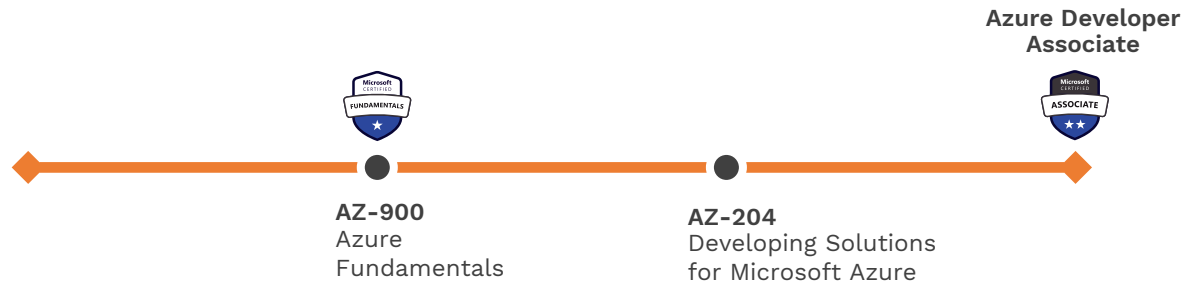

11.10.2021

Become an Azure Solutions Developer in just 4 weeks

Participants in this course want to create end-to-end solutions in Microsoft Azure. Participants learn how to work with container solutions, create Azure functions, implement and manage web apps, develop solutions using Azure storage, implement authentication and authorization, and use Key Vault and Managed Identities to make their solutions more secure.

Integrated into your work day

This program also covers how to connect to and use Azure services and third-party services, and how to integrate event-based and message-based models into your solutions. Finally, it discusses how to monitor, troubleshoot, and optimize Azure solutions. If you are interested in the development of SharePoint Online and Microsoft Teams extensions (MS-600), you will get to know all the necessary requirements in this training.

Can be flexibly integrated into your work day

2 original MS course materials AZ-900 & AZ-204

Preparation of 2 MS Cloud exams
(option to book exam vouchers)

1 year access to the video content

8 live sessions to interact with experts and participants

- + Azure skill-building with an industry perspective

Developing solutions for Microsoft Azure

The course program in detail:

AZ-900 Azure Fundamentals

Description of:

- most important Azure concepts
- Azure core services
- core solutions and management tools in Azure
- general security and network security functions
- identity, governance, data protection and compliance functions
- Azure cost management and service level agreements

AI-204 Developing Solutions for Microsoft Azure

- Build Azure app service web applications
- Implement Azure functions
- Develop solutions that use Blob storage
- Develop solutions that use Cosmos DB storage
- Implement IaaS solutions
- Implement user authentication and authorization
- Implement secure cloud solutions
- Implement API management
- Develop App Service Logic Apps
- Develop event-based solutions

As preparation for certification: **Microsoft Certified Azure Developer Associate**

 **900+**

Hours of learning content

 **300+**

Experts

 **90+**

Industry partners

 **4000+**

Themes

Our thematic areas

 Industrial IoT & Connectivity

 Software Engineering

 Machine Learning

 Additive Manufacturing

 Industrial Security

Digital Enablement of Corporate Employees

University4Industry, founded in 2015, is a leading provider of re- & upskilling in digitization. Our team combines the in-depth knowledge from industry experts with the latest technologies, while using a modern learning approach based on didactics and learning psychology. We offer companies the efficient qualification of employees for digital transformations, specific to different target groups.

As an official Microsoft Learning Partner, we offer training on everything related to Azure Cloud in our unique learning format.

Are you interested? Do you have questions about an individual program? We will be happy to explain further details or give you a test user account to access our learning content.
