- + Led by IT experts (MCTs, MVPs, etc.)
- + Practical exercises in the LAB
- + Live sessions via Microsoft Teams

Blended learning incl. 7 live sessions

17:15 – 18:15

Target group: Software engineers, developers, data scientists

750€ per person

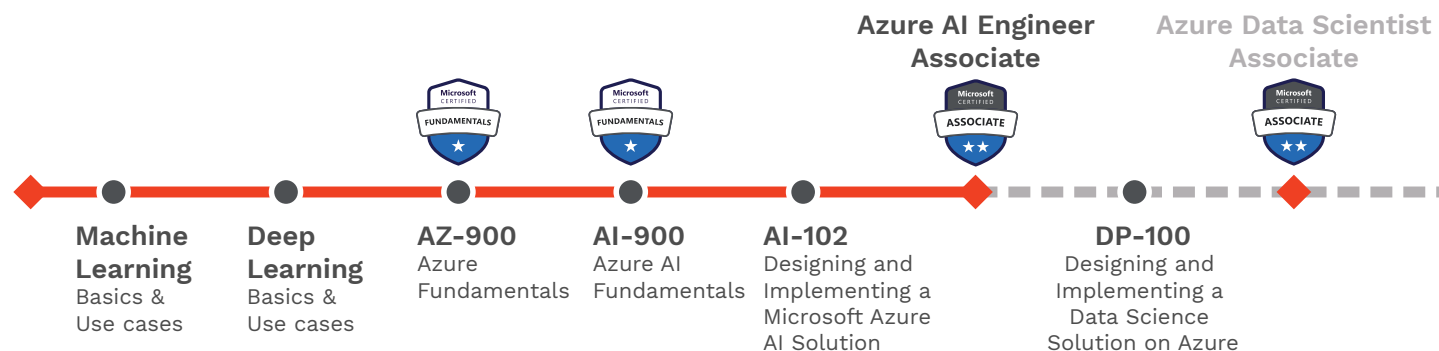

Azure Cloud & AI Digital Learning Program

Become an Azure AI Engineer Associate in just 4 weeks

Integrated into your work day

Acquire the knowledge needed to design and implement Azure AI solutions in our course program. You will get an overview of Azure Cognitive Services and learn to use them in a solution-oriented manner. In addition to the standardized Microsoft content, renowned industry experts will explain the technologies using various use cases.

The program starts with the necessary basics around the Azure Cloud and AI. For the advanced part from AI-102 onwards, programming basics (C#/Python) are required. For participants who want to develop their own AI models, DP-100 is also recommended.

Can be flexibly integrated into your work day

3 original MS course materials

Preparation of 3 MS Cloud Exams (option to book exam vouchers)

1 year access to the video content

7 live sessions to interact with experts & participants

Microsoft Partner

900+ hours of learning content
